ABOUT ME

I am a front-end developer with a bachelor's degree in Computer Engineering. I am passionate about building engaging user interfaces and always eager to learn and implement new technologies. I'm a proactive individual who enjoys tackling challenges and continuously refining my skills in dynamic and fast-paced environments.

WORK EXPERIENCE

AFEA Group   01/25 - Present
Frontend developer

I have been working as a Frontend Developer at AFEA Group, where I contribute to the development and optimization of web applications. This role allows me to apply my frontend development skills while collaborating with a team to deliver high-quality user experiences and efficient solutions.

Pasha Bank   06/24 - 09/24
Frontend developer (Internship)

During my 3-month frontend internship at Pasha Bank, I worked on projects using microfrontend architecture, wrote unit tests, and collaborated with the team to develop innovative solutions, enhancing my skills in modern front-end practices.

Innovation and Digital Development Agency   02/24 - 05/24
Frontend developer (Internship)

During my internship at the Innovation and Digital Development Agency (IDDA), I worked on creating a digital login system for a government platform using Next.js. This experience allowed me to apply my skills in modern web development while contributing to a significant government project.

FindIn   11/23 - 11/24
Frontend developer

At FindIn, an innovative e-commerce startup, I worked on developing and enhancing the platform, which allows users to place orders and receive offers from sellers. During my time there, I gained significant experience in e-commerce development, improved my skills in Next.js, and deepened my expertise in React. My role focused on building and optimizing features to enhance user engagement and streamline the ordering process.
